Physicians at Washington Hospital Center

Electronic Health Records

- E.g. patient transfers in the hospital
- Event types:

 ARRIVAL

Arrive the hospital

 EMERGENCY

Emergency room

 ICU

Intensive Care Unit

 FLOOR

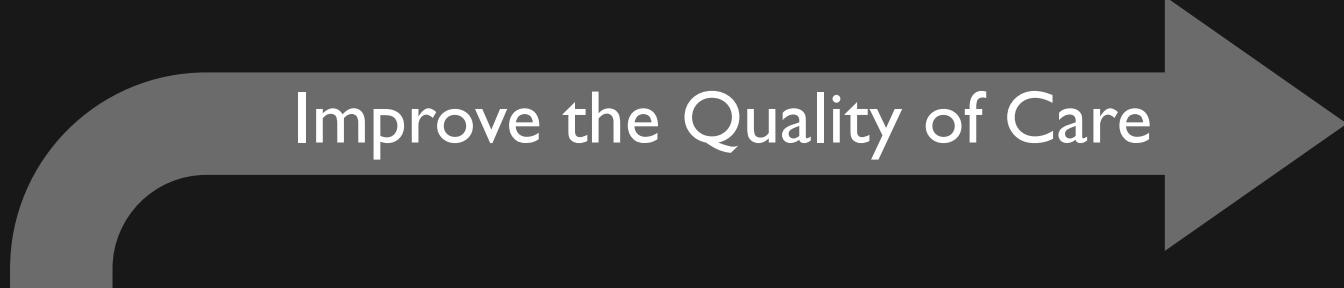

Normal room

 DISCHARGE-ALIVE

Leave the hospital alive

 DIE

Leave the hospital dead

Improve the Quality of Care

Patient ID: 45851733

Patient ID: 45851732

Patient ID: 45851731

1 .
1 1 12/02/2008 14:26 Arrival
1 1 12/02/2008 14:26 Emergency
1 1 12/02/2008 22:44 ICU
1 1 12/05/2008 05:07 Floor
1 12/08/2008 10:02 Floor
12/14/2008 06:19 Discharge

Emergency Department

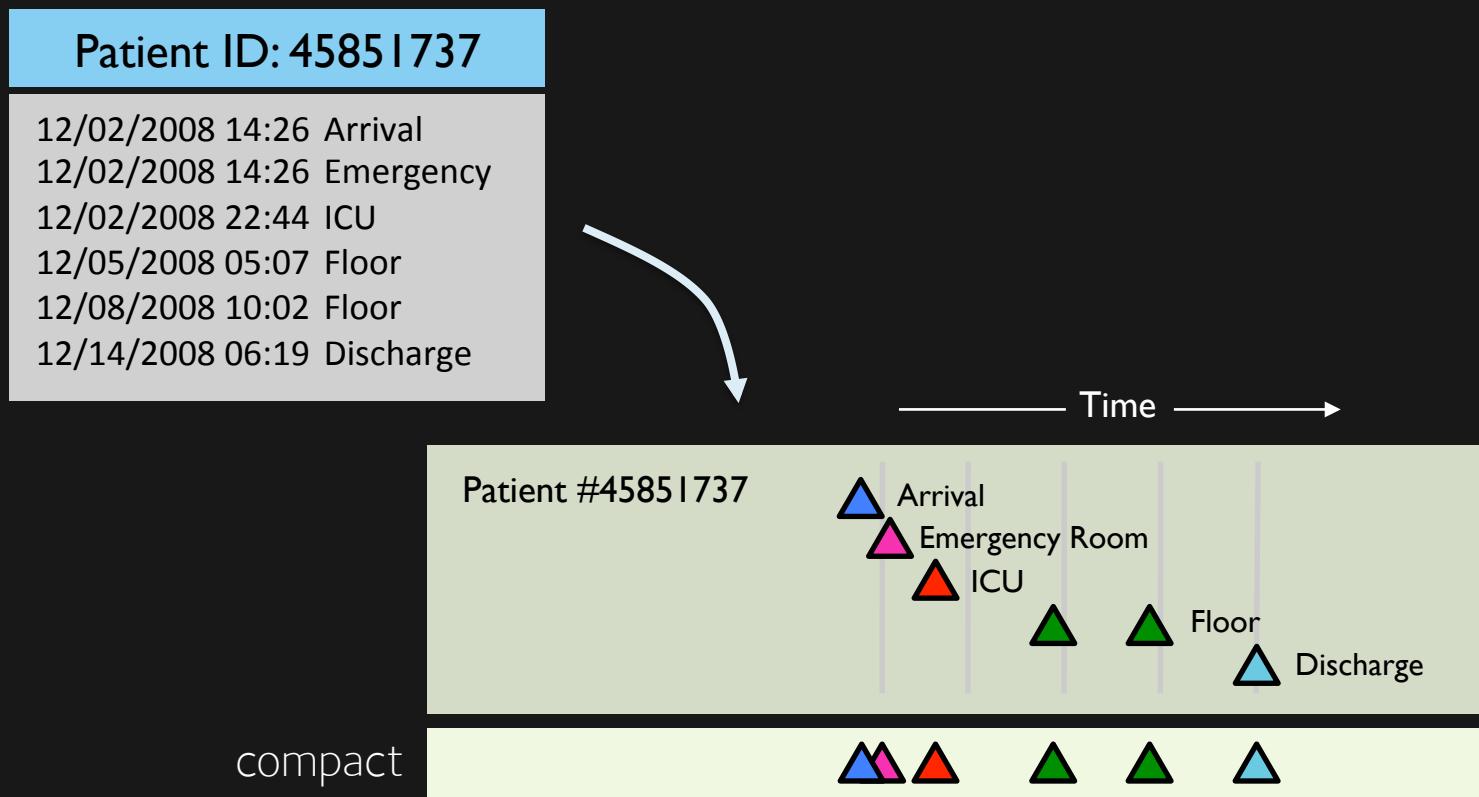

6,000+

patients per month

Visualizing event sequences

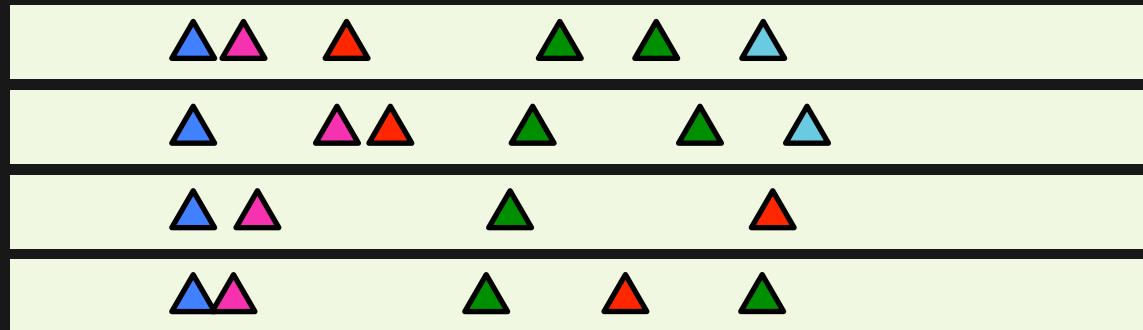

From one event sequence...

- Single record [Cousins91], [Harrison94], [Plaisant98], ...

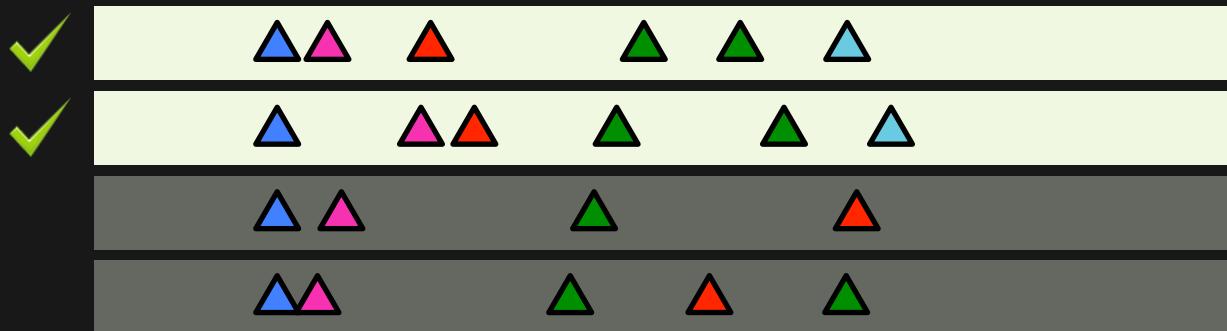

To multiple event sequences...

- Search [Fails06], [Wang08], [Vrotsou09], ...

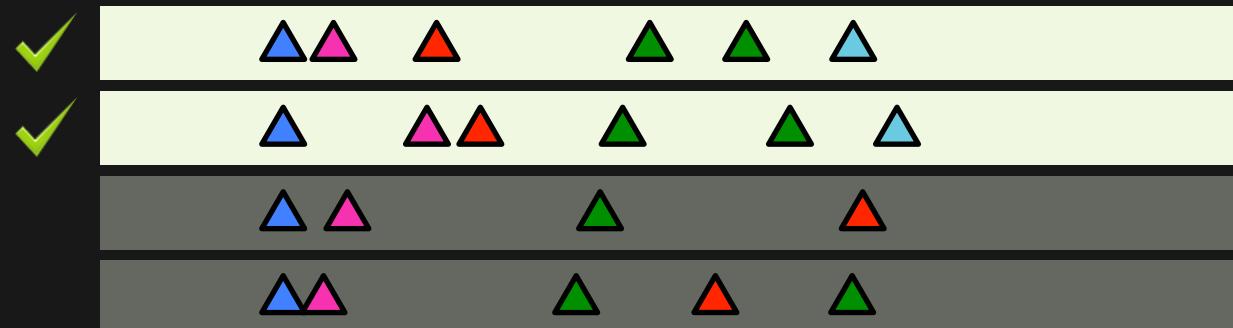

To multiple event sequences...

- Search [Fails06], [Wang08], [Vrotsou09], ...

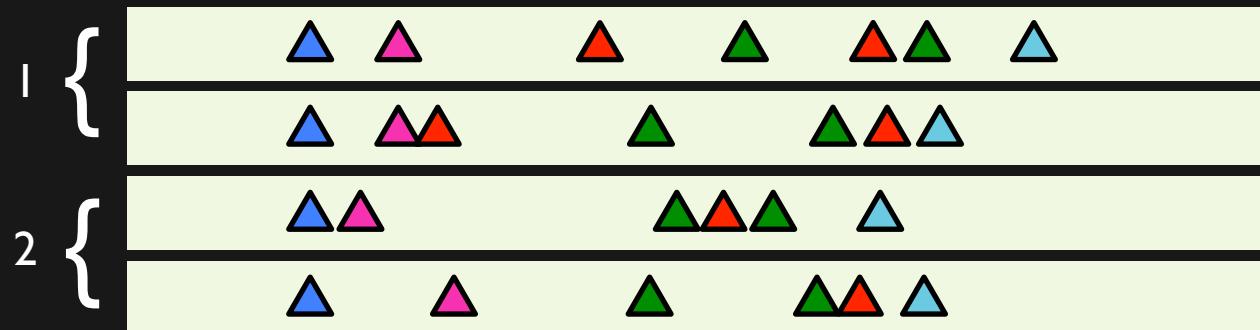

To multiple event sequences...

- Search [Fails06], [Wang08], [Vrotsou09], ...

- Group [Phan07], [Burch08], [Wang09], ...

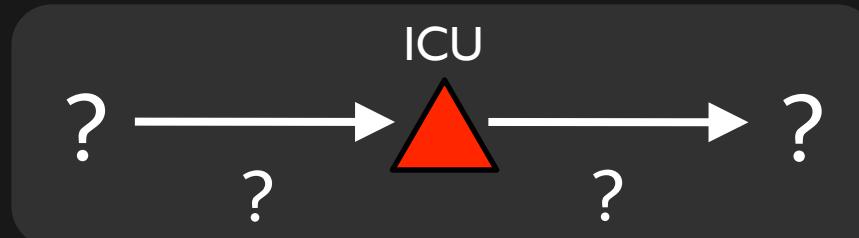

Summarize

e.g. 1) What happened to the patients after they arrived?

2) What happened to the patients before & after ICU?

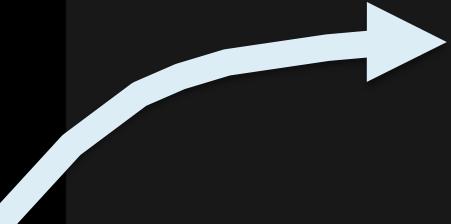

Overview / Summary

Millions of records

Challenges

- Display millions of records on one screen
 - Limited space (typical monitors)
 - Scalability (millions of records?)
 - Aggregation
- While preserve important information
 - All possible sequences
 - Gap between each pair of events

LIFEFLOW

Picture > 1000 words

LifeFlow > 1000 event sequences

LIFEFLOW

... is novel

... is scalable

... provides the missing overview

... summarizes all possible sequences
and time gap between events

DEMO

LifeFlow Demonstration

Case Study#1: Medical

6,000+

patients per month

→ Improve the Quality of Care

Feedback

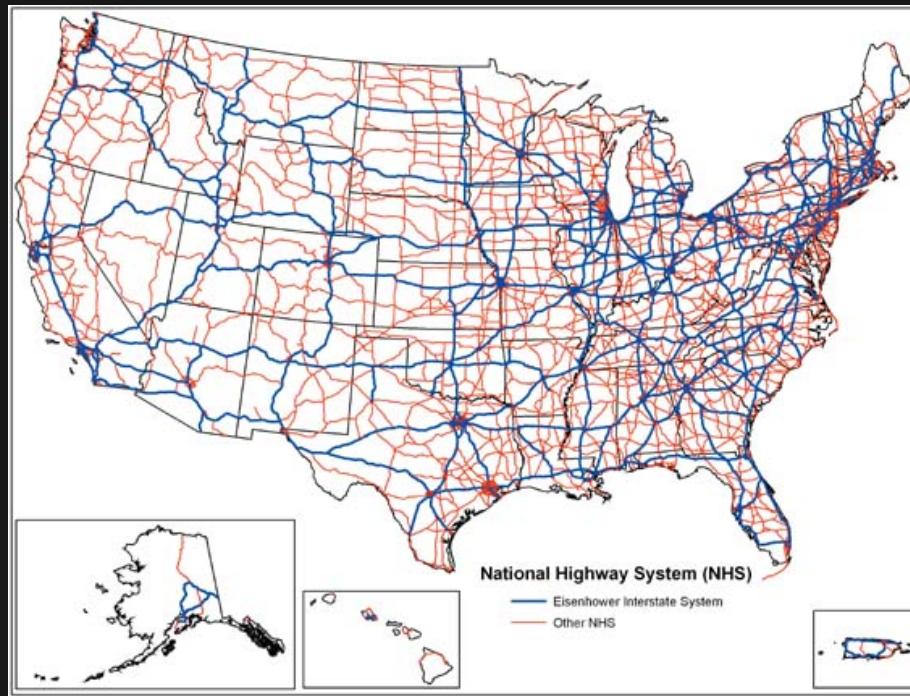

- Big picture + anomalies
- Less worry about query formulation,
more time thinking about new questions
- Long-term monitoring

Case Study#2: Transportation

200,000+

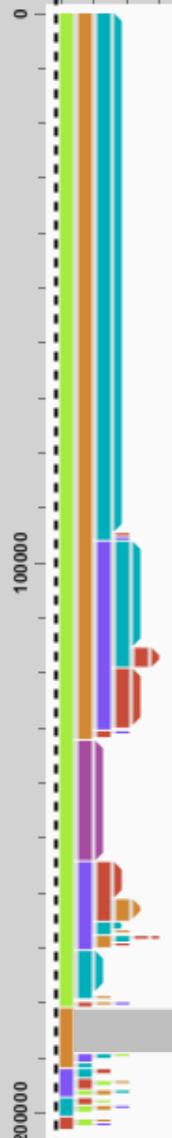

traffic incidents

Compare traffic agencies

Case Study#2: Transportation

200,000+

traffic incidents

Compare traffic agencies

Feedback

- Reveal unexpected sequences
- Identify data errors
- Can ask more questions, faster, and richer
